The present invention is a combination business form having first and second parts that are separable from one another one of the parts is used for recording information acquired in an exigent or emergency medical situation and the other part is used to provide at least one detachable patient identification piece such as a wristband, tag or the like. The business form assembly is intended for use by medical triage or paramedic personnel in providing an initial medical diagnosis of a patient and for identifying the patient for subsequent treatment and transporting to a care facility. The form assembly may be provided in a kit arrangement and include additional components such as a sample collection piece, collection tool and the like. In addition, each of the components may be provided with matching indicia so as to facilitate the tracking of the patient or individual during transport, treatment and handling.

Diagram illustrating the Emergency Medical Analysis Form assembly. The assembly includes a main form (10) and a detachable tag (11x). The main form (10) contains the following sections:

- TRIAGE TAG** (23)
- CONDITION** (16):
 - ☐ STABLE
 - ☐ CRITICAL
 - ☐ DESCEASED
- LABEL** (20, 25, 26, 123)
- PRELIMINARY DIAGNOSIS** (18)
- DATE:** _____ **PARAMEDIC:** _____
- TIME:** _____ **LOCATION:** _____

The detachable tag (11x) includes a **TAG** section (24) with a matching indicia (123). Dimensions 12, 14, 16, 18, 20, 22, 24, 25, 26, 13, 13x, 11, and 13 are indicated.
